Summary

Detail-oriented Information Technology graduate majoring in Business Analytics with experience in data analysis, SQL, Python, Power BI, and dashboard development. Skilled in building automated data pipelines, database management, and transforming complex datasets into actionable business insights. Passionate about data storytelling, predictive analytics, and business intelligence in entry-level Data Analyst and Business Analytics roles.

Technical Skills

- **Programming:** Python, SQL, PHP, JavaScript, Dart, R
- **Data Analytics:** Power BI, Tableau, Excel, Pandas, Jupyter Notebook, Data Visualization, KPI Reporting
- **Databases:** MySQL, PostgreSQL, Firebase, Supabase
- **Web Development:** HTML5, CSS3, Tailwind CSS, Bootstrap, AJAX, React, Next.js, Laravel, Flutter
- **Tools:** Git/GitHub, VS Code, Figma, XAMPP

Experience (Internship/OJT)

Software Developer Intern | Arktech Philippines, Inc. | Feb 2026 – May 2026

- Developed "Mieruka Board," a web dashboard integrating live PMS database charts to visualize cross-departmental KPIs for data-driven decisions.
- Developed an Applicant Tracking System using the OpenAI API for resume parsing and HR workflow automation for intelligent resume parsing, significantly reducing manual HR data entry.
- Built dynamic applicant portals and automated email workflows ensuring seamless synchronization with the internal HR database.

Projects

Sales Analytics Pipeline & Executive Dashboard | *Python, MySQL, Power BI, Pandas*

- Built a full-stack Python/Pandas data pipeline to ingest, clean, and stage 10,000+ transaction records into a structured MySQL database.
- Designed an executive Power BI dashboard with custom DAX, identifying a regional operational bottleneck where \$500K in gross volume yielded only \$40K net profitability.

Olist E-Commerce Analytics & Forecasting Platform | *Python, Supabase (PostgreSQL), Power BI, Meta Prophet*

- Engineered an automated Python data pipeline (Pandas, SQLAlchemy) to process and migrate 100K+ transactional records into a cloud-hosted Supabase PostgreSQL data warehouse.
- Deployed a Meta Prophet time-series machine learning model to forecast 12-week future revenue trajectories with 95% confidence intervals.
- Designed an interactive Power BI executive dashboard with custom DAX, tracking \$13.59M in revenue and identifying a 6.62% late-delivery issue.

GoBuddy: Lipa Tourism Analytics Platform | *Laravel, Tailwind CSS, MySQL, JavaScript, Livewire, Blade* | Full-Stack Developer

- Developed a full-stack Laravel MVC web platform for the Lipa City Tourism Office, featuring secure, role-based CRUD dashboards for administrators and businesses.
- Implemented interactive analytics dashboards to monitor tourism KPIs, visitor trends, and sentiment analysis.
- Designed responsive, dynamic user interfaces utilizing Livewire, Blade, and Tailwind CSS.

Education

Batangas State University TNEU – JPLPC Malvar Campus

Bachelor of Science in Information Technology – Major in Business Analytics | 2026

Certifications & Workshops

- **Google:** Google Data Analytics Professional Certificate (*In Progress*)
- **DataCamp:** Associate Data Analyst in SQL (*In Progress*) | SQL Fundamentals (*In Progress*)
- **CISCO:** Introduction to Data Science | Data Analytics Essentials | Data Science Essentials with Python
- **Conferences & Workshops:** Batangas Information Technology Conference (BITCON) | Language Legacy: Python Programming and Figma Design
